

The next generation of integrated business planning & supply control solutions

Plan & Control

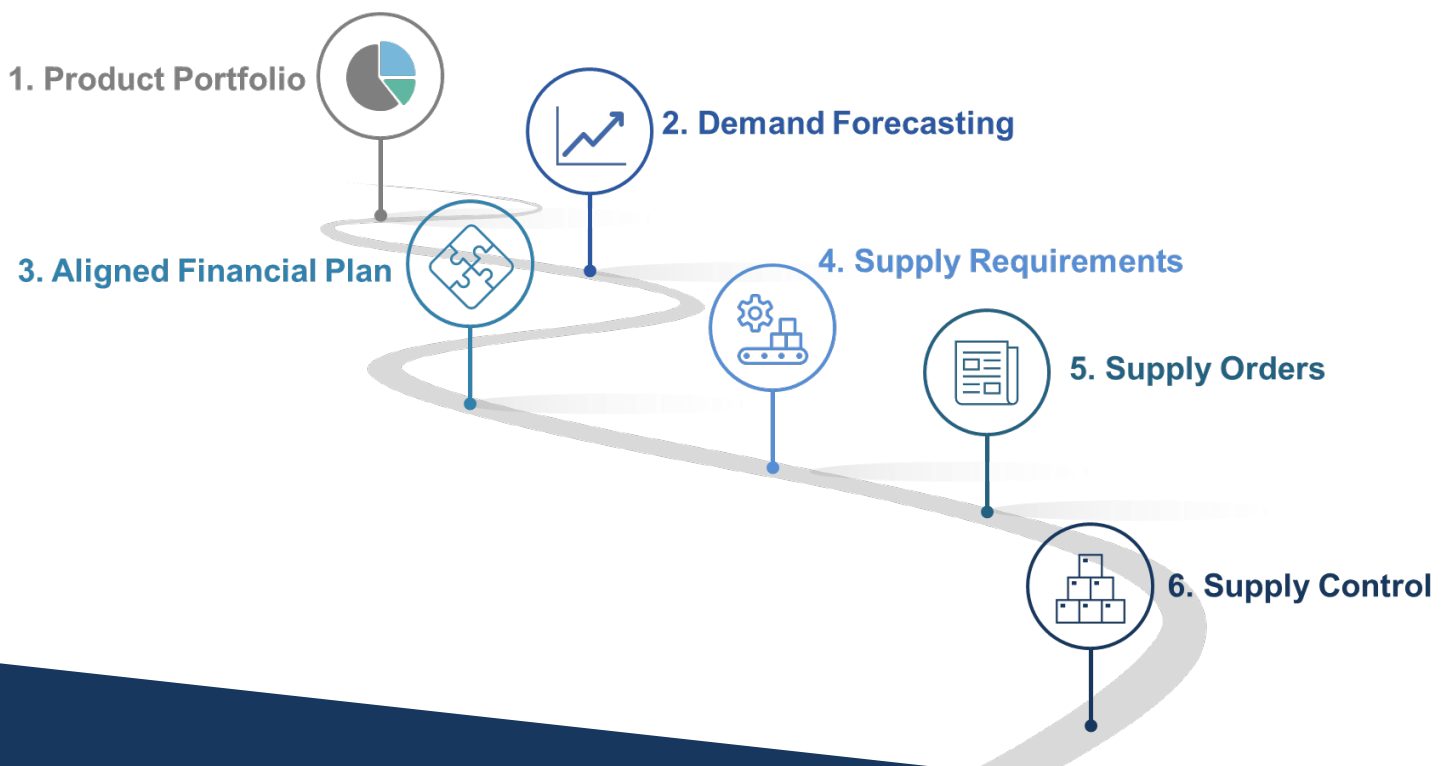

6 focus areas to restore control over your operation and cope with the 'new normal'

Our supply chains and business operations have buckled under the challenges of Covid-19, China supply disruptions, BREXIT and the war in Ukraine, to name a few. Some supply chains have collapsed while others have made the necessary changes to adapt to the 'new normal'.

Utilising expert system-building capability - enabled by our end-to-end purpose-built software, iPac™ - to customise improved processes, Neways has helped numerous clients adjust to new, more efficient way of working.

SIX FOCUS AREAS IN ESTABLISHING ROBUST PLANNING & SUPPLY CHAIN OPERATIONS

BUSINESS PLANNING

1

PRODUCT PORTFOLIO

Segment portfolio with the visibility to adjust your products to suit the market volatility and prioritise the *Product Plan*

2

DEMAND FORECASTING

Ability to generate a statistical forecast with auto cleansing for unforeseen events, e.g. Covid-19, and validate forecast with customer and product insights, as the *Demand Plan* that everyone works to

3

ALIGNED FINANCIAL PLAN

Visible product, sales and supply plans with financial impact for integrated end-to-end decision making, all encompassed in *One Plan*

SUPPLY CHAIN CONTROL

4

SUPPLY REQUIREMENTS

Establish supply requirements from the demand plan and optimise supply policies to align inventory requirements with projections, as the *Supply Plan*

5

SUPPLY ORDERS

Schedule and optimise production and purchase orders against supply requirements, with notification alerts to enable early adjustment to demand and supply variations

6

SUPPLY CONTROL

Monitor demand and supply in real time against the plan, and adjust accordingly in response to variations in a controlled way

iPac™ Integrated Planning and Control

The only Business Planning & Supply Chain software you'll ever need

iPac™ Integrated Planning and Control is a business planning and supply chain operations solution that is configured around a multidimensional planning framework of control functions that are indispensable in our challenging new business climate. The traditional software frameworks, set up to accommodate static monthly procedures, are no longer adequate in today's less predictable conditions and we see many businesses and organisations throw their plans out the window and losing control of their operations. The challenge of our 'new normal' is that everything becomes an exception.

Neways and iPac™ have developed and implemented a comprehensive planning & operational framework, enabled by software that is both static and active, to work seamlessly across monthly planning, weekly scheduling and daily control.
